EDUCATION

10.2015 – 07.2018

- BA in Logistics
- Facility: **Management**
- University of Economics in Katowice

10.2018 – 07.2020

- Msc in Economic Analyst
- Facility: **Statistics, Econometrics and Mathematics**
- University of Economics in Katowice

IT SKILLS

Intermediate level:

JavaScript

jQuery

HTML5

CSS3

Figma

Media Queries

GIT/Github

Postman

API REST

AI Tools

Tailwind

Bootstrap

Kamil Przybyła

Mid Frond-end Developer / Tester / Data Analyst

ABOUT ME

I am a Front-End Developer specializing in JavaScript. I develop my knowledge and skills through various types of projects and courses. My additional asset that helps me with programming is my extensive mathematical knowledge and my previous experience as a data analyst.

My professional experience includes work in the data processing, security, and analysis industry, where I gained experience in solving business problems and providing proposed solutions, working on many projects, and mastering English to the C1/C2 degree.

Currently, I work as a Front-End Developer. I am no longer a beginner but a mid-level specialist with 2.5 years of professional experience as a Front-End Developer and Manual Tester. I have programmed in jQuery, Vanilla JavaScript and ReactJS on the front end, successfully completing many programming tasks and contributing to various projects. This experience has allowed me to strengthen my technical expertise, collaborate effectively within teams, and deliver high-quality solutions in real-world business environments.

In addition to my professional work, I base my personal projects on React, with a particular focus on React Native. I plan to further develop my career in the direction of mobile development and the use of artificial intelligence. In my free time, I build mobile applications with React Native, which allows me to continuously expand my skills and explore innovative technologies.

EMPLOYMENT HISTORY

KENO Sp. z o. o. (07.2023 – now)

- Mid Front-end Developer/Tester
 - designing, developing, and maintaining front-end features for sales-oriented web applications using JavaScript, jQuery, and React,
